

Vinyl Post Installation Made Easy

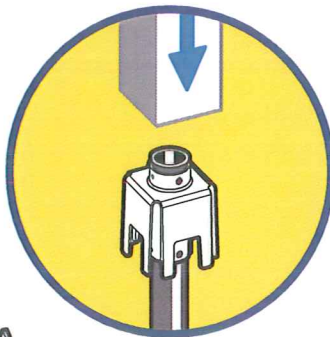

*Patented
The Rook®
Post Mount*

1
Drive the steel post using a post driver or sledge hammer. Our Earth Auger drill is recommended for drilling pilot holes into soil.

2
Attach "The Rooks®" using the screws provided.

3
Slide the vinyl post over "The Rooks®" to complete the post installation.

Size:

*Four (4) sizes are available:
Fits 4" and 5" vinyl sleeves with
and opening of 1-7/8" and
1-5/8" for round pipe.*

Vinyl Post Concrete Install Kit.

Now You Can Tackle that Fence
Project Yourself with The Rook.

The Rook Post Mount is made of 100% PVC. It is designed as a spacer which is attached to a steel pipe and then secures a vinyl post. This creates a very solid and strong foundation for attaching a fence. It is ideally suited for concrete applications.

Ideal for concrete applications:

Patios

Landings

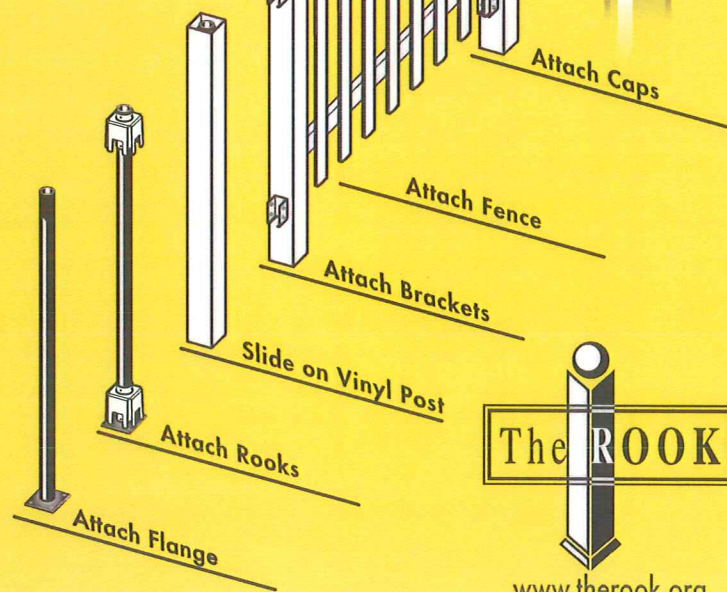

Porches

Driveways

Tools required:

- Hand drill
- Masonry drill-bit
- Concrete fasteners
(Titen anchor screws)

The Rook vinyl post mounting system includes a 4' steel flange post and two Rook adapters.
