Introducing Corigin™ Technology

Better from the inside out

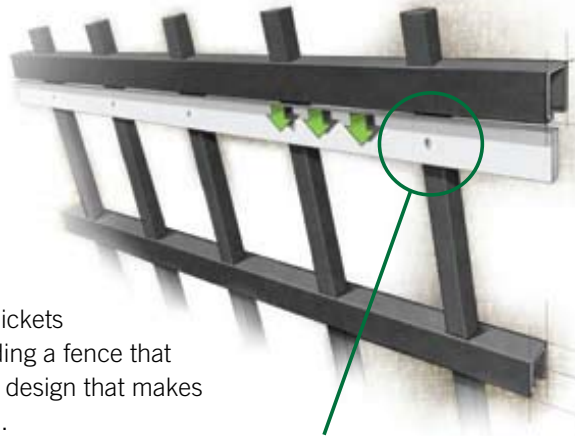

ActiveYards has a whole new way for you to think about aluminum fencing. With a patent-pending construction system called Corigin, we connect the pickets and rails from the inside, fortifying the core and building a fence that outperforms all other standard fencing. It's a smarter design that makes ActiveYards the strong, beautiful choice for your yard.

Our Strength is at the Core

ActiveYards aluminum fencing with Corigin technology features a solid metal core that runs through the center of each rail to help it stand strong through the seasons.

What's the biggest difference? No screws. With time and weather, screws on traditionally built fences can loosen, rust or break. Our core is designed with interior locking pivots that grip each picket of the fence just as tightly as screws, but without the wear and tear.

Locking Core Pivot

Beauty from all Angles

A key to a beautiful fence is its ability to rack or flex and follow the natural slopes of your yard. Corigin technology allows our fencing to rack farther so that it can flex to angles that other standard fencing just can't.

traditionally built fences

Corigin technology

Part of the reason our fencing racks better is because ActiveYards aluminum fencing eliminates screws altogether. Not only does this make for a more gracefully laying boundary, it also eliminates the eyesore of screws. With ActiveYards aluminum fencing, you have a perfectly smooth-looking fence from both sides. Now you can love every view of your yard.

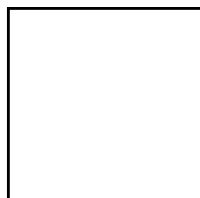

Color that Lasts

You work hard for vibrant landscaping, and your fence shouldn't pale in comparison. Our advanced technology protects it from the sun's harmful rays so the color you choose today will keep a bright, like-new finish for seasons to come. Even when the sun is at its brightest, your fence should be too. That's why we've created an exclusive color retention technology, SolarGuard, which helps your fence outperform others against the sun's harmful rays.

The secret of SolarGuard is in the unique composition of the fencing material itself. SolarGuard technology is actually infused as the fence is created, helping to protect its color from the inside out. Where standard fencing fades or discolors as a result of sun exposure, you can rest assured that SolarGuard helps your ActiveYards fence retain its original color beautifully for years, guaranteed.

Warranty

TRANSFERABLE LIMITED LIFETIME WARRANTY

ActiveYards warrants its fencing products against defective materials or workmanship for as long as the original homeowner/consumer owns his/her home. If the original purchaser is a corporation, partnership, government, public entity, or other commercial user, the Warranty period shall be twenty (20) years from original purchase date. *ActiveYards* warrants its fencing products against rotting, peeling, chipping, cracking, flaking, splintering, corroding, rusting, or abnormal discoloration under normal use, service, and care. *ActiveYards* will, at its option, repair or replace the product in question with new *ActiveYards* product of equivalent value at no charge.

The foregoing is only a portion of the *ActiveYards* fencing warranty and is therefore conditioned upon customer's satisfaction of the terms and conditions set forth in the complete *ActiveYards* fence warranty. Please ask your *ActiveYards* representative or visit www.activeyards.com for a copy of the complete warranty.
